

Purefection,
in every drop.

Highest quality drinking
water for the home.

FilmTec™ RO Residential Elements

More premium water, faster.

The best balance of flow and highest rejection rates up to 99%. FilmTec™ Reverse Osmosis (RO) Home Drinking Water Elements are designed to meet your customers' varying needs from tap water to tougher raw water. Delivering more premium water, faster. Know that you're giving your customers great tasting water they can trust with FilmTec™ residential elements – the most reliable, consistent, and highest quality in the industry. It's one more way DuPont is helping to raise the home water quality standard to abundant purefection, drop after drop.

FilmTec™ RO Home Drinking Water Elements

Made in the U.S.A and NSF-certified, FilmTec™ RO Elements undergo world-class quality and process checks to ensure they last longer, operate reliably, and provide more water, delivering industry-leading flowrates up to 20% higher than other RO elements at similar pressures.

FilmTec™ BW60-1812-75

- 75 gpd
- 99% stabilized salt rejection
- Designed to meet tougher raw water needs

FilmTec™ TW30-1812-100HR

- 100 gpd
- 98% stabilized salt rejection
- Designed to meet tap water needs

For high-quality water, the choice is clear.

With more than 30 years of experience in water treatment and a proven track record of performance and reliability, DuPont is a preferred supplier of RO elements for home water treatment systems—and a name homeowners count on when it comes to water quality for their families.
